Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Schneidewend et al (US 6,249,320).

Claim 1:

The claimed "storage section for storing the major channel and plural receivable subchannels broadcast by the broadcasting station according to the major channel" is disclosed, see Fig. 1 item 60, col. 5 line 63 to col. 6 line 4, where storage section is disclosed as claimed;

the claimed "major channel output section for outputting the major channel stored by said storage section" is disclosed, see Figs. 12, 13;

the claimed "differentiation section for differentiating between the subchannel in selection and the subchannels stored in the storage section other than the subchannel in selection" is disclosed, see Fig. 12, col. 4 lines 43-57;

the claimed "subchannel output section for outputting the subchannel in selection differentiated by said differentiation section and the subchannels other the subchannel in selection" is disclosed, see Fig. 12, col. 11 lines 49-63.

Claim 5 is disclosed, see Fig. 12 where subchannels (MINOR channels) are sorted according to a predetermined condition as claimed.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 3, 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schneidewend et al (US 6,249,320).

Claim 2:

The claimed "said differentiation section is constructed so that the subchannel in selection and the subchannels other than the subchannel in selection are set to different colors" is not explicitly disclosed by Schneidewend, as claimed in claim 2. However, Official Notice is taken that setting channels to different colors, different fonts and/or font sizes, is a very well procedure in the art that would facilitate channel selection. An artisan would be motivated to implement this procedure in Schneidewend's disclosure in order to facilitate channel selection. Therefore, the claimed invention would have been obvious to a person of ordinary skill in the art at the time the invention was made.

Claims 3, 4 are rejected for the same reasons as claim 2.

Response to Arguments

5. Applicant's arguments with Affidavit/Declaration are persuasive, the Final Rejection is withdrawn and a new Non-Final Rejection is presented above to the Applicant.
